

# Vo Quoc Le Quan

Birthday: 25/05/1995

Address: 343 To Hien Thanh, district 10, Ho Chi Minh city

Email: [le.quan@outlook.com](mailto:le.quan@outlook.com)

Website: <https://quan-vo-blog.firebaseio.com/>

- Responsible individual with deep understanding about programming and confident to work as a team player.
- I have diverse technical skills in many fields and always love to learn new technology.
- Now, I'm looking for a challenging opportunity to levitate my career, especially in project management.

---

## EXPERIENCE

### SAIGON TECHNOLOGY SOLUTIONS (April 2018 - PRESENT)

#### *Mobile developer*

- As a React Native developer, I develop cross platform mobile applications for both Android and iOS devices.
- I'm fluent with ES6 and have a firm grasp of React - Redux ecosystem, and adept at using Java to implement native modules in Android, as well as using Objective-C for iOS.
- My projects have many technologies like Firebase Cloud Messaging and Push Notifications, Google Map SDK, Google Fit SDK, HealthKit SDK (Apple Health), social login with Facebook, Google, ...
- At the beginning of every project, I often setup codebase and build project structure from the ground, implement common components and generic template to ensure modular consistency.
- Deploy and distribute app version via Microsoft App Center.
- When working in a team, I often plan and hold sprint meeting on a weekly basis, break down complicated user stories into small, manageable tasks, support team members with best practices and review code daily.

**NOVOBI** (August 2017 - April 2018)

### *Odoo software engineer*

- My main responsibilities were to communicate with Product Owner and analyse requirements, then design and implement system features for businesses.
- On top of Odoo platform, along with Python and PostgreSQL, I implemented many ERP modules like Sales, Purchases, Manufacturing, Inventory, and a little bit of Accounting.
- When the system became more complicated, I also wrote documents describing business process and visualized data flow with graphs, also supporting customers with understanding the system and maintain legacy modules.

## EDUCATION

### **Ho Chi Minh University of Science (HCMUS)**

*Bachelor of Science in Software Engineering* (2013 - 2017)

GPA: 8.48

Studied in one of the best universities for computer science, I was a distinct student who awarded in Dean's List among the top 5 highest score students.

[Dean's List 2015 - 2016](#)

## CERTIFICATE

**TOEIC - 880**

## SKILLS

### **Adept skills**

- React Native, Redux
- Java SE, Java - Android
- HTML - CSS - Javascript
- RESTful API
- Agile - Scrum

### **Basic knowledge**

- Java EE, Spring MVC, Hibernate ORM, Swing
- C#, .NET framework, WPF, Winforms
- Python, Odoo

- Objective-C, C++
- SQL, RDBMS

## **Working/Programming tools**

- IntelliJ IDEA, Webstorm, PyCharm, AppCode, DataGrip
- Android Studio
- Visual Studio
- Git
- Jira - Confluence, Trello
- App Center

## **ACHIEVEMENT**

### **Bluebird Award 2016**

Map Assistant, my favorite Android project, is in the top 40 best applications of the Bluebird award 2016.
